

L-42- Valuation Basis (Life Insurance)
Reliance Life Insurance Company Limited
Registration with IRDA : 121 dated 03 January 2002

VALUATION BASIS FOR THE QUARTER ENDED 30TH SEPTEMBER, 2012

A Chapter on Valuation basis covering the following minimum criteria.

a. How the policy data needed for valuation is accessed.

The policy details under Individual and Group policies are maintained in the database. The details of the policies as at 30 September 2012 were frozen and backed-up after the close of the business.

b. How the valuation bases are supplied to the system

As on 30 September 2012, 88% of the policy liabilities were Unit Linked. The unit linked liabilities recorded in the policy administration systems were reconciled with the Investment Accounting system. The balance of 12% policy liabilities comprise of liabilities in respect of Individual Par, Individual Non par and Group Term Insurance Business. Majority of the policy liabilities under Individual Par and Individual Non Par Business are valued using PROPHET actuarial software. Valuation bases are fed to this software using tables. A very small proportion of the policy liabilities (0.6%) are valued using the excel spreadsheets. The liabilities under Group Term Insurance Business are valued using Unexpired Premium method.

1) Interest : Maximum and minimum interest rate taken for each segment

i. Individual Business	Maximum	Minimum
1. Life- Participating policies	6.75%	6.75%
2. Life- Non-participating Policies	6.25%	6.25%
3. Annuities- Participating policies	Not applicable	Not applicable
4. Annuities – Non-participating policies	Not applicable	Not applicable
5. Annuities- Individual Pension Plan	Not applicable	Not applicable

6. Unit Linked

The Unit Liabilities are the balances in the policyholders' accounts plus additional reserve for mortality and expenses. No assumption is required for balances in policyholders' accounts. The majority of the additional reserve is calculated using the assumptions under Non participating policies. An insignificant proportion of additional reserve is based on unexpired charges.

7. Health Insurance - Linked

The Unit Liabilities are the balances in the policyholders' accounts plus additional reserve for hospitalisation risk and expenses which is calculated based upon Unexpired charges. It does not require any assumption.

ii. Group Business

The liabilities under Unit Linked and Non linked Group business with explicit charging structure are the balances under policyholders' accounts plus additional reserve for mortality. No assumption is required for balances under policyholders' accounts. Under majority of business, the additional reserve is based on unexpired charges wherein no assumption is required. Under a small proportion (0.2%) of business, the additional reserve is based on the assumption used under Individual non par business. Under Group Term Insurance, the liabilities are calculated using Unexpired Premium Method wherein no assumption is required.

2) Mortality Rates : the mortality rates used for each segment

The mortality rates used for valuing policy liabilities are based on the published mortality table - India Assured Lives Mortality (1994-96) (modified) Ultimate with adjustment to reflect expected experience and with an allowance for adverse deviation

- 3) Expenses:** Policy related maintenance expenses have been based on the medium term level of expenses projected in the Company's financial model. The maintenance expenses are subject to inflation consistent with the investment returns assumed. Commission rates have been assumed as per the Company policy and as paid
- 4) Bonus Rates:** Policy liabilities under Par Business are valued using bonus rates consistent with the current and future experience.
- 5) Policyholders Reasonable Expectations:** Most of the business is under Unit Linked and Non Par policies wherein the policy benefits are not subject to the discretion of the Company. As on 30 September 2012, only 6% of the policy liabilities were under Par Business. The expectations of these policyholders are managed by declaration of bonus in line with the current experience under Par policies. 6% of the policy liabilities were under Non Linked Non Par Business where Company declares the Accumulation Rate at the start of the Financial Year. The expectations of these policyholders are managed by declaration of Accumulation Rate in line with expected investment return during the Financial Year.
- 6) Taxation and Shareholder Transfers:** An allowance is made for the tax @ 14.1625%. The Shareholders' share of profits is at the rate of 100% and 10% under the Non Par and Par Business respectively.
- 7) Basis of provisions for Incurred But Not** An explicit provision for IBNR was made based on the total claims paid during the year.
